

REGIONAL HEALTH DISTRICT

A regional health district comprising multiple hospitals and facilities needed to address specific weaknesses or gaps in their cyber security function including:

- ❖ A new email phishing solution as well as related training,
- ❖ A new vulnerability scanning capability, and
- ❖ A new GRC⁽¹⁾ solution.

Solution:

- ❖ Review of cyber security exposure (current risks in ERM⁽¹⁾) and requirements to prepare formal RFTs⁽²⁾.
- ❖ Market survey to identify suitable vendors and products.
- ❖ Managed end-to-end procurement cycle to evaluate multiple vendors. Product solutions were evaluated, selected and implemented.

Benefits:

- ❖ Significant reduction in exposure and a more robust security posture were achieved.
