

CHARITY ORGANISATION

Not-for-Profit organisation needed advice on selecting an appropriate Cyber Security Insurance Policy covering all operations, fund-raising activities, and technology landscape.

This meant working with multiple insurers to help them assess the charity's cyber security risk exposure and deal with any requirements or actions mandated by the insurer to activate policy and maintain validity for the life of the policy.

Solution:

- ❖ Multiple policies evaluated against charity's operational and technology risk profile.
- ❖ Assisted charity in selecting policy and facilitated negotiations with legal, and audit and risk committees.

Benefits:

- ❖ Suitable policy selected by charity resulting in savings, and
- ❖ Cyber risks mitigated resulting in reduced exposure.
